

Spring School 2018 March

Hello everyone!

It's starting to warm up and it has been nice and sunny every day! It's beginning to feel a lot like spring and that means that Spring School is coming before you know it! This year we will be learning all about the HUMAN BODY. We have an especially exciting week planned answering all of your questions about the human body!

On the first day of Spring School, we will be learning about the heart. What does our heart do and why is it so important? What happens to our heart when we do exercise?

On day two, we will learn about our lungs. How do our lungs help us breathe? What happens to the air that we breathe? We will make a fun craft to help us understand about our lungs!

On the third day of Spring School, we will learn about blood. What does our blood do? What does it look like inside of our bodies? What is a white blood cell?

On day four, we will learn about our stomach. What happens to the food that we eat? Where does it go? Why do we poop?

On the last day of Spring School, we will learn about our bones and play a fun game putting together a skeleton!

See you at Spring School!!!

<Topics for each day>

* Day 1 March 26th (Mon)

"What does our heart do and why is it so important?"

* Day 2 March 27th (Tue)

"How do our lungs help us breathe?"

* Day 3 March 28th (Wed)

"What does blood do?"

* Day 4 March 29th (Thu)

"What happens to the food that we eat?"

* Day 5 March 30th (Fri)

"We will learn about our bones."
